

Improve Urban Environment : Best Practices and Further Challenges

Presented by
H.E U Maung Maung Soe
Mayor of Yangon City
Myanmar

Vision - Sustainable Green, Clean and Healthy Environment towards a Brighter Future for Myanmar.

Mission - To develop and implement the holistic and integrated urban environmental management strategy based on principles of inclusiveness, zero waste, zero emission and circular economy to achieve a greener, cleaner and healthier environment in Myanmar.

❑ Improve Urban Environment, it is underlined by the principles of the Sustainable Development Goals (SDGs) to achieve multi-dimensional benefits such as environmental, social and economic which are keys to promote Clean Air, Clean Water and Clean Land within the City Area.

Setting Goals of National Waste Management Strategy and Action Plan

- Goal (A) Extending sound waste management practices for all types of waste to eliminate uncontrolled treatment, disposal and open burning
 - Goal (B) Promote waste minimization, reuse, recycling and recovery to establish a resource circular society
 - Goal (C) Ensure sound budgeting for securing sustainable sources of revenue for waste sector
 - Goal (D) Awareness raising, advocacy and capacity building
 - Goal (E) Compliance, monitoring, enforcement and recognition
- 

CRITICAL URBAN ENVIRONMENT ISSUES

Urban Development and Management

- Social Service
- Urban Landscape and Management
- Public Parks and Greenery Area
- Capacity Development for Infrastructure Development

Urban Infrastructure Development

- Urban Transport
- Sustainable Road Network
- Circular Railway Network
- Ports and Logistics
- Water Supply
- Sewerage and Drainage
- Solid Waste Management
- Telecommunication

Best Practices of Urban Development

Benefits for Urban Environment

Economic Benefits

- Agglomeration Economies
- Lower Infrastructure and Operating Costs
- Reduced Congestion Costs

Social Benefits

- Job Creation
- Poverty Reduction and Social Equity
- Improvement in Quality of Life

Environmental and Health Benefits

- Reducing Pollution and Improving Public Health
- Ecosystem Services and Risk Reduction

Yangon's Economic Development Towards Sustainability

- *Economic*
- *Society*
- *Environment*
- *People*

Sustainable Development

- *Low Carbon Society*
- *Green Area*
- *Green Products*
- *People Participation*

Green Economy

- *Innovation*
- *Relationship*
- *Recycle Market*
- *Information, Education Development*

Knowledge-based Economy

- *Natural Resources*
- *Supported by organization*
- *lack from more cost*

Resource-base Economy

Thank you for your attention
